The City of Norman will continue its public discussion series regarding high density development on Monday, July 9, from 6:30 -8:30 pm at the Norman Public High School Conference Center (911 W. Main St.). Parking for the Conference Center is located on the east side of Berry. This public discussion will be the third in the six-meeting series and this session will focus on aspects of mixed use development and height of high density structures in Norman. The public discussion will begin with a general orientation and introduction to the evening's topic, and groups will then engage in round-table discussions with a moderator and other citizens to express their ideas regarding the evening's topic. The information and feedback from these public discussions will later be used by the City to help guide future policies related to high density development. Anyone interested in high density development is invited to take part in the meeting.

Citizens wishing to stay informed about the meetings are encouraged to visit the City's website and sign-up for the email list for updates regarding the high density public discussion series. Information, meeting materials and presentations from each meeting will be posted on the City's website. Updates will also be available on the City's Facebook page and Twitter account.
